

WATER EFFICIENCY COMPLIANCE

Save money, save water !

ATTENTION PROPERTY MANAGERS AND LANDLORDS

At Tonkin Plumbing we aim to motivate our customers into optimising their energy efficiency in everyday life. Taking a shower, cleaning the dishes or brushing their teeth are simple pleasures we enjoy in Australia, though we need to be aware of where we can make a difference to the environment and to our pockets!

We also understand that owners of investment properties want to maximise their rental return, and this is how we can help!

NSW Office of Fair Trading has legislation that has made it easier than ever for landlords to meet the minimum water efficiency standard for and pass on the charges to tenants. It is easy and inexpensive to setup and make your investment compliant with the water efficiency guidelines.

We provide products that adapt to your existing tapware that lower the flow rate to make them comply. The guidelines are in place so that the right amount of water is delivered, neither too little or too much.

Call us today on (02)60401797 OR visit our website www.tonkinplumbing.com.au and let us help raise your rental return and together we can all save the world's most precious resource!
